Postdoctoral Position - Cognitive Neuroscience of Cognitive Control, Learning, and Decision Making

Applications are invited for a Postdoctoral Research Associate position in the Cognitive Control and Memory Lab at Brown University. Our lab conducts NIH-supported research on the neural basis of cognitive control. Applications are welcome from scientists with interests broadly related to the study of cognitive control, working memory, reinforcement learning, decision-making, and frontal lobe function. Fellows will be responsible for collaboratively designing and conducting experiments on these topics, in addition to preparing the results for publication. For additional information on research in the lab, visit http://www.cog.brown.edu/research/badrelab/index.html

Applicants must hold a PhD in Cognitive Science, Neuroscience, Psychology, or a related discipline, or must show evidence that the PhD will be completed before the start of the position. A background in computational modeling is preferred but not a requirement for this position. The position can begin immediately with a term of one year and may be renewed up to three years.

To apply, please send a current CV and the names and contact information for 3 references to Dr. David Badre (David_Badre@brown.edu). Applications will be reviewed as they are received until the position is filled.

Brown is an Equal Opportunity/Affirmative Action Employer.
