Postdoctoral Position - Developmental Cognitive Neuroscience of Cognitive Control

Applications are invited for a joint Postdoctoral Research Associate position in the Developmental Cognitive Neuroscience Laboratory (Dima Amso, PI) and Cognitive Control and Memory Lab (David Badre, PI) in the Department of Cognitive, Linguistic, and Psychological Sciences at Brown University. Our labs conduct collaborative, NIMH-supported research on the development of cognitive control with a focus on the effects of early life experience. Applications are welcome from scientists with interests broadly related to the study of development, cognitive control, attention, working memory, reinforcement learning, or decision-making. Fellows will be responsible for collaboratively designing and conducting experiments on these topics, and preparing the results for publication.

Applicants must hold a PhD in Cognitive Science, Neuroscience, Psychology, or a related discipline, or must show evidence that the PhD will be completed before the start of the position. A background in cognitive development is preferred but not a requirement for this position. The position can begin immediately with a term of one year and may be renewed up to three years.

To apply, please send a current CV and the names and contact information for 3 references to Prof. Dima Amso (dima_amso@brown.edu) or David Badre (david_badre@brown.edu). Applications will be reviewed as they are received until the position is filled.

Brown is an Equal Opportunity/Affirmative Action Employer.
